和の趣

Invite the beauty
of each season
into your home

*The essence
of Japan*

春

SPRING

The soft scent of blossoms drifts by – spring has already arrived in the garden.

夏

SUMMER

A breeze like freedom – it hums a swaying tune, drifting on the summer wind, dancing over green fields.

秋

AUTUMN

A hushed twilight fills the air. The trees begin to change, hinting at the coming deep season.

冬

WINTER

As trees deepen their roots in the earth, people, too, turn inward – welcoming the quiet of the new season.

5th ROOM®

Concepts and products for your building and garden

There are many encounters with the environment around buildings for every person every day. People meet and interact with others or enjoy a connection with nature in the garden. In Takasho's product world, these areas form the "5th ROOM" as an important part of daily living space – alongside the kitchen, living room, dining room and bedroom.

Through the harmonious design of the "5th ROOM", from the entrance area to façades and fencing elements to garden rooms and lighting, all five senses of residents and guests are engaged. This creates an atmosphere that invites people to spend time there by day and by night and fosters a state of well-being.

Inspired by Japanese garden culture with the meaning of the seasons and the elements of wind, light, water and greenery, Takasho has developed a range of matching products for this purpose – especially in the combination of building and garden design.

Takasho supports architects, planners and construction professionals from the very beginning in developing tailored, harmonious overall concepts and elegant execution solutions.

Our Product Series

- EVER ART WOOD®**
Laminated aluminium profiles
- EVER ART BOARD®**
Laminated aluminium composite panels
- EVER BAMBOO®**
A perfect replica of natural bamboo
- TAKE GAKI**
Traditional craftsmanship & premium quality
- LEDIUS**
Extra-low-voltage lighting system for garden & exterior
- ARTPORT®**
Aluminium in wood design for the carport

... offer tailor-made solutions for

- Facade, ceiling or wall claddings
- Room solutions for terraces and garden canopies
- Fences & visual protection
- Garden & outdoor lighting
- Gates, entrance areas and enclosures
- Carports
- A wide range of accessories

Product specifications

-  Products with single-sided design
-  Products with double-sided design
-  For indoor and outdoor use
-  For indoor use only

Material labels

-  Products made from Acrylonitrile styrene acrylate
-  Products made from Styrene acrylonitrile
-  Products made of weather-resistant acrylonitrile-ethylene-styrene

10 YEARS WARRANTY

- on 1. the fading of the colour
- and 2. the cracking of the panels

EVER BAMBOO®

EVER BAMBOO® combines the benefits of cutting-edge technology and materials with the proven techniques of traditional craftsmanship. This gives the panels – made of specially reinforced ASA resin – numerous advantages, allowing for a wide range of applications. At the same time, the natural bamboo atmosphere is preserved.

Durability

The high quality of EVER BAMBOO® ensures that the surface finish is not affected by temperature fluctuations, rain, or sunlight.

Texture

The three-dimensional structure creates subtle shadows and a surface closely resembling natural bamboo.

Material

The strong material guarantees excellent stability and long-lasting weather resistance.

Design

The finishing touches are applied by hand, without compromising on any detail.

DELUXE ARTISAN BAMBOO

As with our "ECO BAMBOO", we have faithfully reproduced the expressive nature of real bamboo while incorporating the techniques of traditional artisan craftsmanship. The result is our "DELUXE ARTISAN BAMBOO": each bamboo section's individual character and knots are replicated in an impressively realistic way.

ECO BAMBOO DELUXE

The wonderful characteristics of natural bamboo are faithfully reproduced using environmentally friendly materials. The special expression of each individual section is meticulously captured from beginning to end. Certain sections of the bamboo have been hand-finished by our craftsmen to create a perfect replica of real bamboo.

ECO BAMBOO

黒竹

Black

The toned black lines of Black Bamboo create a subtle, elegant impression. Subdued and natural, they suit both contemporary and classic designs. Takasho has replicated the chromatic texture and distinctive sheen of Black Bamboo with great care. Every detail is faithfully captured.

Sarashi

さらし

Takasho's careful attention to detail is thoroughly demonstrated in the soft and lucid tones of our Sarashi bamboo. Its uniform colour tones and matte finish add a sense of subdued refinement known as "Wabi-Sabi." Takasho is proud of the techniques that we have refined and perfected over many years, culminating in the most realistic bamboo reproductions available on the market.

EVER BAMBOO® will never compromise

in its commitment to detail.

Antique

古竹

Our Antique Bamboo panels have been carefully created to reproduce the seasoned appearance and visual softness of aged bamboo, which you would typically see in temples, in contrast to the Yellow Bamboo. Antique Bamboo is ideal for those seeking to create a slightly dignified space of understated beauty.

あじろ Ajiro

Distinctive yet delicate young bamboo shoots have been woven together to create beautiful diagonals and sections with gradations of colour. From whichever angle you view it, shapes are cleanly defined, and the smooth, vividly toned bamboo emits soft shadows and feelings of elegance and luxury. Our Ajiro panels are a faithful reproduction of this ornate garden with all its subtleties.

Natural colours

The variety of colour tones is faithfully crafted to reflect different types of bamboo. Surfaces weathered by wind and rain can also be reproduced, as can bamboo that has been refined using traditional methods.

Realistic surfaces

The bamboo structure is shaped with meticulous attention to detail and precision, echoing the beauty of nature. Three-dimensional forms and hand-painted finishes produce the unique, natural appearance of the EVER BAMBOO® series.

Classic themes

With a broad selection of traditional patterns, EVER BAMBOO® panels offer a wide array of design options – perfect for both classic and modern Japanese-style gardens.

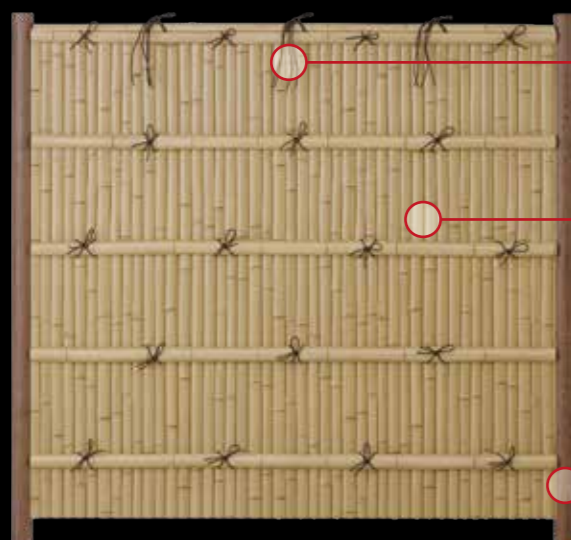

EVER BAMBOO®

EVER BAMBOO® SET

EVER BAMBOO®

We have carried on the timeless techniques of traditional Kyoto craftsmen to create elegant product solutions that replicate the look of natural bamboo fences and decorations.

All inclusive assembly kit

All components needed to create a fantastic bamboo fence are pre-processed and packed as a set.

Modular system

Depending on your needs, mounting sets are available for two different module types. The "basic" type fits with posts, is suitable for installation as a free-standing standalone element, while the "extension" type is used to expand your fence in the desired length. We also offer a single or double-posted version for the modules. Select the type that best suits your design.

Visible & covered posts

Select from either visible posts or covered posts in accordance with the spatial clarity and continuity of your fence design.

Classic Motifs

Kenninji

Named after the renowned Zen temple Kenninji in Kyoto, the Kenninji fence features split bamboo poles joined seamlessly, creating an atmosphere of calm elegance.

It provides a harmonious structure to Japanese gardens, serving as both backdrop and privacy screen.

Its understated form highlights the natural character of bamboo – ideal for meditative gardens or tea houses.

Prefabricated Modules ✓

Assembly Set ✓

Misu

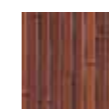

The name Misu is inspired by large bamboo screens once used in temples to divide interior spaces.

Its closely stacked bamboo rods offer privacy while gently defining space with an elegant, serene presence – equally suited to traditional and modern Japanese-style homes and gardens.

Prefabricated Modules ✓

Assembly Set ✓

Shimizu

Often used to enclose shrines, the Shimizu fence stands out with its clean lines and consistent bamboo structure.

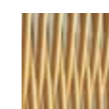

It accentuates the natural beauty of bamboo while creating a refined, calming atmosphere – perfectly aligned with the aesthetics of classical Japanese gardens.

The design of fine, vertically aligned bamboo rods is ideal for screening a garden from the street while still allowing air and natural light to pass through.

Prefabricated Modules ✓

Assembly Set ✓

Otsu

The name Otsugaki stems from the front-and-back weaving of bamboo rods and the geographical relationship between the cities of Otsu and Kyoto – Kyoto lies in front of Otsu, and vice versa. This interplay gives the fence its name.

The spacing between the thin bamboo rods lets in light and air, lending the fence an elegant character – ideal for defining quiet zones or accompanying garden paths.

Prefabricated Modules ✓

Assembly Set ✓

Ajiro / Kyo-an

Ajiro, meaning "fishing net," refers to the intricate, diagonally woven pattern of this fence type, bringing a dynamic and authentic flair to Japanese gardens.

Kyo-an, literally "a place of peace in Kyoto," describes fences with simple horizontal lines, reminiscent of the restrained architecture of traditional Kyoto tea houses.

EVER BAMBOO® SET

Solutions for various installation situations

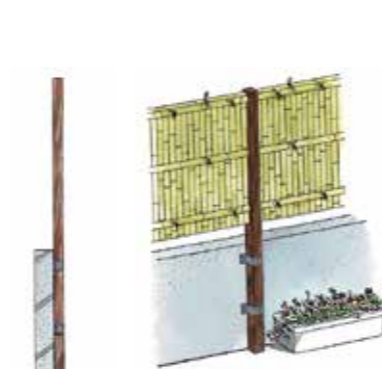

On slopes ...

Our bamboo fences can also be installed along slopes and staircases.

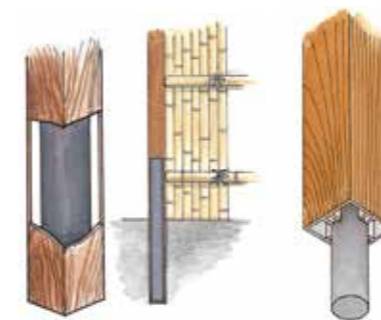

Direct wall attachment

If posts cannot be embedded in the ground, our post brackets with wall anchors offer a practical solution.

Even in windy locations ...

With the separately available aluminium reinforcement, even sites exposed to strong wind or snow loads can be stabilised.

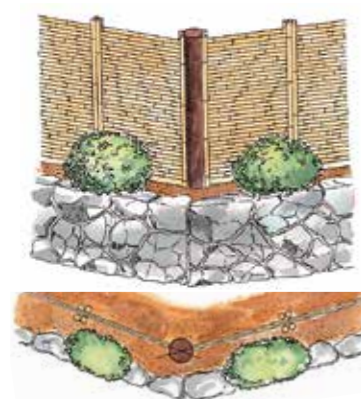

Installing aluminium roof tiles

To mount posts with roof tiles, the tile profile is fixed to the posts and the aluminium roof tiles are placed on top.

Flexible corner angles

For flexible angles at the ends of the fence, we recommend our round aluminium post system.

Square post example:

Two posts are required.

Round post example:

Caps with 45° markers allow for precise alignment.

Adjustable C-profile clamps let you set the desired angle.

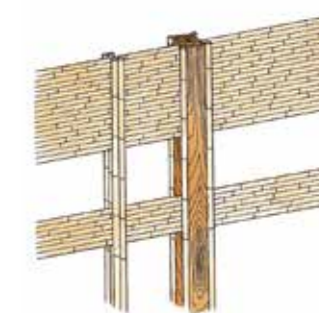

Bamboo fences higher than 1800 mm (Panel Connections)

For fences over 1800 mm tall (e.g. EVER BAMBOO® "Keninji Fence"), vertical panel joints should align with the horizontal structural supports.

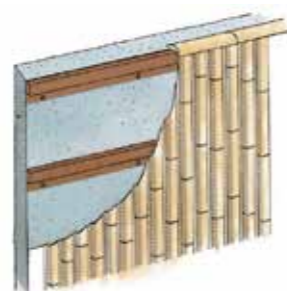

Window opening in ECO BAMBOO fence

Aluminium reinforcements or wood elements can be inserted between the horizontal and vertical bamboo poles to create a window-like gap.

Wall renovation and cladding ...

With wall-mounted horizontal bars, bamboo panels can be attached without embedding posts.

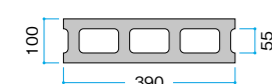

Post reinforcement

Support bars available separately.

Mounting on concrete block walls

Existing holes in concrete blocks can be used to anchor the posts with appropriate core rods.

Block dimension: 10 cm
Example configuration: Reinforced post (Ø 40) with aluminium anchor

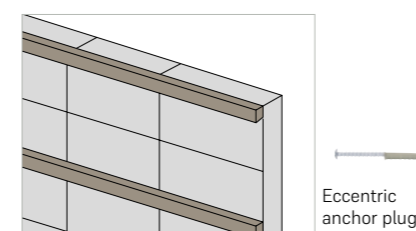

Mounted on top of a wall

Even on concrete slabs or block tops, fences can be installed using separate mounting plates.

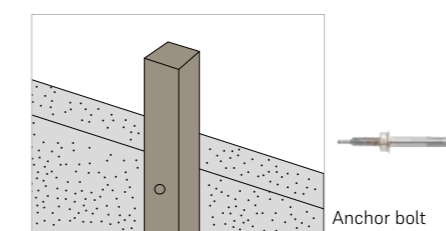

Mounting materials

• Support profile on concrete

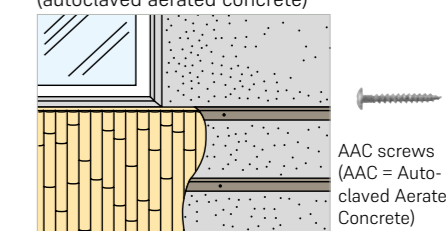

Eccentric anchor plug

• Post on concrete

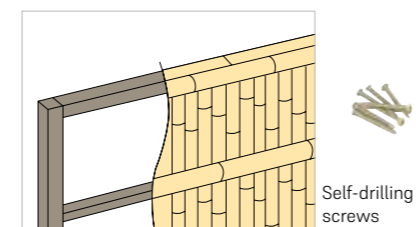

Anchor bolt

• Mounting profiles for AAC (autoclaved aerated concrete)

EVER BAMBOO® MATERIAL

Beautiful natural appearance

A bamboo fence is an essential part of any traditional Japanese garden. However, it can be difficult to preserve the natural beauty of real bamboo. To overcome these challenges, we developed the EVER BAMBOO® product range, which mimics natural bamboo while offering excellent resistance to mould, corrosion, and discolouration, ensuring lasting beauty.

Subtle 3D contours

The three-dimensional surface structure creates subtle contours that shift with the light, enhancing the visual texture of the bamboo fence throughout the day.

Realistic section knots

The distinctive texture and appearance of natural bamboo have been meticulously recreated to reflect the original's unique characteristics. Each bamboo section features its own detail and expression, representing refined emotion and harmony.

Durable and sustainable

EVER BAMBOO® incorporates specially reinforced ASA resin – a premium material used globally in a variety of industries. This advanced material is highly durable and weather-resistant, with outstanding resistance to corrosion and discolouration, and ensures a consistently beautiful appearance.

Highly workable

Exceptionally durable, yet flexible and easy to process – ideal for cutting and handling.

EVER BAMBOO® MATERIAL

With the excellent material properties of our sticks, unique fences can be constructed freely, just like those made from natural bamboo.

Premium Details

Each segmented knot is uniquely shaped to create a beautiful, natural appearance. Choose from our premium DELUXE **ARTISAN BAMBOO** with individually hand-painted joints, our DELUXE **ECO BAMBOO** with finely crafted joints, or our Standard **ECO BAMBOO**, offering excellent cost efficiency.

Superior technique

The three-dimensional surfaces of the sticks create subtle shadowing effects. The ASA and ABS resins used make the material simultaneously strong, lightweight, and durable. Our products are environmentally friendly, containing no polyvinyl chloride (PVC).

Highly realistic

The beautiful texture and feel of natural bamboo has been carefully replicated to faithfully reproduce every fine grain and detail.

EVER BAMBOO®

We have preserved the timeless techniques of traditional Kyoto craftsmen to create elegant solutions that authentically replicate the look of natural bamboo fences and decorations.

EVER BAMBOO® MATERIAL

ECO BAMBOO DELUXE

Environmentally friendly double-layer structure

TAKEGAKI PRODUCT SERIES

TAKEGAKI

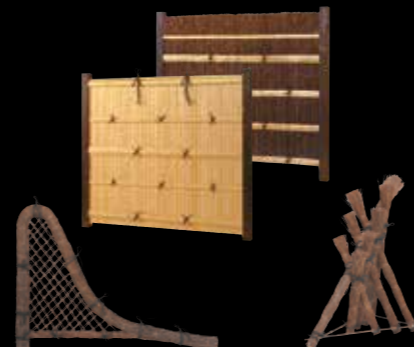

Traditional techniques and craftsmanship result in unique, handcrafted products made from natural bamboo.

The fusion of carefully selected natural materials and traditional craftsmanship results in uniquely beautiful products of premium quality.

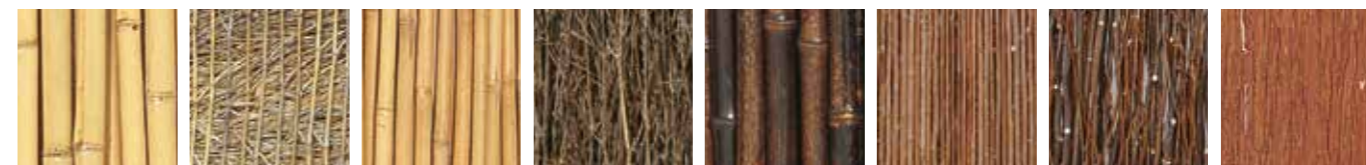

The textured, nodular surface is crafted piece by piece with meticulous care by our skilled craftsmen in Japan.

Even a single module serves beautifully as an accent in your garden landscape. All TAKEGAKI products can be ordered individually, and custom configurations are always available.

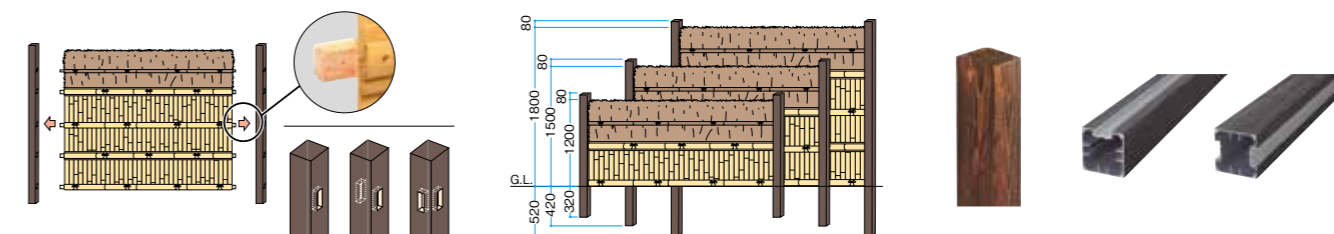

Material and colours

Colour variance and deviations may occur

Light bamboo Light twigs Arrow bamboo (Metake) Dark twigs Dark bamboo Lespedeza (Hagi) Lindera (Kuromoji) Cedar wood

Modular system

Modular construction allows for easy assembly.

The handmade panels can be easily connected side by side, fitted to corner posts or installed in wall recesses.

Available in three standard heights

(H): 900 mm, 1200 mm, and 1500 mm. The fence can be seamlessly integrated into any garden setting.

Posts made of natural wood or aluminium

The material should be chosen to complement the atmosphere of the property and the surroundings.

Kenninji Natural Bamboo Panels

Kenninji Panels

Kenninji

Standard dimensions: W1800 mm × H1200-1800 mm

Available as single or double-sided model.

The single-sided version is available either with or without rear cladding.

Kenninji panel with light twigs

Dark twigs

Light twigs

Single-sided models are provided with the standard rear cladding.

Misu Natural Bamboo Panels

Misu Simon Bamboo

Standard dimensions: W1800 mm × H1200-1800 mm

Only available as double-sided version.

Misu Dark Bamboo

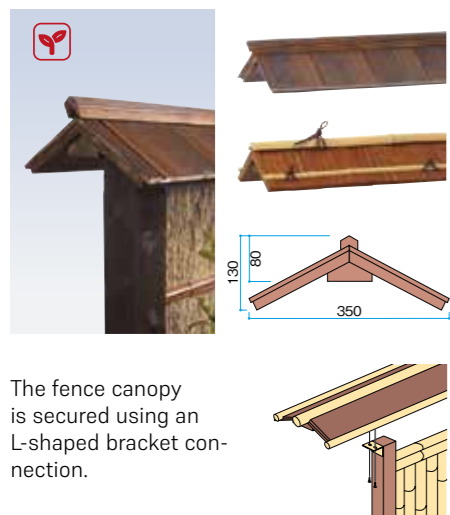

Standard dimensions: W1800 mm × H1200-1800 mm

Only available as double-sided version.

TAKE GAKI PRODUCT SERIES

Roofs, Garden Gates and Doors for Fences

Standard sizes available on request

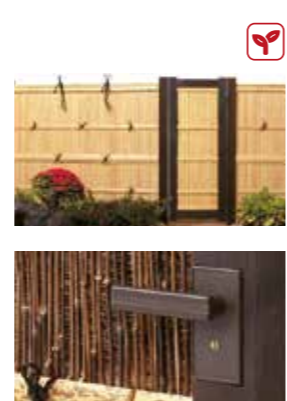

The fence canopy is secured using an L-shaped bracket connection.

Kenninji-Garden door
SNG - 2: W700 × H1500 mm

Kuroho-Garden door
SNG - 1: W700 × H1500 mm

Well-balanced combination of modern cylinder locks with a traditional construction.

Copper Post Covers
The Antibacterial effect of copper protects the natural wood from rotting.

SN-CK9
W90 × D90 × H45 mm
