

Seamless design with integrated gates

FREESTYLE FENCE // Matt Black

FREESTYLE GATE // Matt Black

# FREESTYLE FENCE Overview

## 01

### Own custom design for fence and gates

The frames for the fence modules are available in 4 standard sizes. The pattern can be freely designed with flexible spacing. A selection of 13 decors and 7 profile cross-sections is available for this purpose. In combination with the posts for stacked elements, fences up to a height of 2 m can be built.

Gates are also available in matching standard sizes and can be designed in the same pattern as the fence modules or freely.

#### // Create your own fence design

Front

Back

- \* Different profile cross-sections can be combined.
- \* All designs are prefabricated as fence modules.
- \* Profiles can only be mounted on one side of the fence frame.
- \* Module frames are only suitable for horizontal designs.

- \* Different profile cross-sections can be combined.
- \* The profiles must be shortened in the area of the lock and door handle.
- \* The profiles can only be mounted on one side of the door frame.
- \* Door frames are only suitable for horizontal designs.

### Decors // 13 Freely combinable options

### Profiles // 7 cross-sections freely combinable

### Frame colour variations

\* Depending on the colour chosen, delivery may take longer. Please take note of the delivery date!

## 02

### Complete modular units ex works for easy assembly

The module units are pre-assembled at the factory according to the dimensions and spacing you require. This means that assembly on the fence posts on site is quick and smooth.

#### // Easy assembly with modular system

540 ~ 2000 mm  
Module height  
H1120  
H920  
H720  
H540

\*When using a multi-level free post

\* Position for door handle and lock are fixed.  
\* A centre strut is installed from a height of 1.6 m.

## 03

### Simply and securely mounted

The fence modules are hooked onto the free-standing posts with the brackets and secured with screws. Due to the slim design, the fittings are barely visible and are additionally hidden at the top of the posts by matching cover caps.

#### Thought out functionality

Hinges with pivot and a door edge design that neatly joins the top surface in the line of sight ensure seamless integration of the door into the fence surface. Drop bars with cushioning provide additional comfort.

#### Mounting the modules on the post in only 3 steps

Insert the module into the lower brackets on the post

Hang the module on the post with the upper brackets

Place the cover caps on the posts and fasten with screws

Fully assembled

## 04

### Harmonious design for fence and gate

The pattern of fence modules and gate can be individually and harmoniously matched. In this way, the gate blends seamlessly into the fence. All designs can be created with posts visible from the outside or concealed. When integrating a gate into the fence, they are mounted on two special fence posts, which reduces the total number of posts.

#### // Seamlessly integrated gates

The gates are attached to the posts of the adjacent fence modules

Concealed post, back of fence. Posts are supplied incl. fastening.

#### Adjustable hinges with pivot

Upper hinge

Lower hinge

#### High-security profile cylinder locks

# Gate equipment

## Equipment and accessories - Specifications and dimensions

### Locks

#### //Lever handle locks

#### //Push-pull locks

### Accessories

#### //Subsequent door installation with adapter

Components for subsequent gate assembly are available as additional accessories. With these, the gate can be mounted directly on posts from a thickness of 100 mm. The design of the gate can be matched to existing roofing and fences.

#### //Doorstop

Doorstops are optionally available for all doors.
