Notice Regarding a Capital Increase and Strengthening of the Business Foundation of Consolidated Subsidiary Takasho Digitec Co., Ltd.

Takasho Co., Ltd. (the “Company”) announces that it has today (September 18, 2026) carried out a capital increase with the aim of strengthening the financial foundation of its consolidated subsidiary, Takasho Digitec Co., Ltd., in preparation for its future business expansion.

As a result of the 70 million yen capital increase, the subsidiary’s share capital will be 55 million yen and its legal capital surplus will be 45 million yen, bringing its total share capital and legal capital surplus to 100 million yen.

1. Background and Purpose of the Capital Increase

Takasho Digitec Co., Ltd., guided by its vision of “Color people’s hearts and minds with light effects” currently operates primarily in the LED sign and lighting/illumination sectors. Going forward, while further enhancing the competitiveness and supply capacity of these existing businesses, the subsidiary will prioritize strengthening its “Light Entertainment Business”—an area focused on providing experiential value through the combination of light and space—including regional revitalization initiatives utilizing light, drone shows, and various events such as seasonal festivals.

The Company has determined that, in order to steadily capitalize on these growth opportunities and translate them into sustainable business expansion, it is essential to make upfront investments in both facilities and human resources, as well as to strengthen the financial foundation that supports these efforts. The purpose of this capital increase is to strengthen the

subsidiary's investment capacity and management foundation during this growth phase, thereby accelerating the growth of existing businesses and the expansion into new business areas.

2. Future Priority Investment Areas

(1) LED Sign Business: Expanding production facilities and processing capabilities; enhancing the ability to handle high-value-added projects; and strengthening the capacity to accommodate short lead times and a wide variety of products

(2) Lighting/Illumination Business: Strengthening product development, engineering, and quality assurance functions; and enhancing manufacturing and supply systems

(3) Strengthening the New Business Area (Light Entertainment Business): Strengthening planning, production, installation, and operational capabilities for various events—including regional revitalization initiatives, drone shows, and seasonal events—while promoting investment in facilities and personnel to create new experiential value through light

(4) Workforce Base: Recruiting and developing specialized talent to support growth in areas such as sales, design, engineering and development, manufacturing, and installation and operations

3. Overview of the Capital Increase

Target Company	Takasho Digitec Co., Ltd.
Amount of Capital Increase	70 million yen
Share Capital After the Capital Increase	55 million yen
Legal Capital Surplus After the Capital Increase	45 million yen
Total of Share Capital and Legal Capital Surplus	100 million yen
Date of Implementation	September 18, 2026
Method of Subscribing to a Capital Increase	Third-Party Allotment of New Shares (Allotment to Parent Company)

4. Future Outlook

Takasho Digitec Co., Ltd. will further enhance the competitiveness of its current core businesses—the LED sign business and the lighting/illumination business—while strengthening various events, including regional revitalization initiatives, drone shows, and seasonal events, as future growth areas, thereby expanding the scope of the “experiential value of light” it provides.

By strengthening its capital base, expanding its production capacity, and investing in specialized talent, the subsidiary will further refine its integrated capabilities—from planning and design through engineering, manufacturing, installation, and operations—and build a business structure capable of meeting diverse needs both domestically and internationally, thereby laying the groundwork for achieving future sales of 10 billion yen.

By accelerating the growth of Takasho Digitec, the Company Group seeks to pioneer new

markets through innovative applications of light while driving the sustainable enhancement of corporate value.

5. Impact on Financial Results

This matter is expected to have a minimal impact on the Company's consolidated financial results.

Should any matters requiring disclosure arise in the future, we will notify you promptly.
